

What is claimed is:

1. A single sheet of foldable material cut and scored to define a container blank, comprising:

- a pair of opposed first side panels;
- 5 a pair of opposed second side panels, coupled with the first side panels;
- a outer bottom panel connected with said first side panel;
- an inner bottom panel connected with said second side panel;
- a first divider panel connected with said outer bottom panel;
- 10 a second divider panel connected with said inner bottom panel; and
- a divider slot formed in said inner bottom panel and said second divider panel;

wherein the width of said divider slot is at least twice the thickness of the first divider panel.

15 2. The blank of claim 1, wherein the sheet of foldable material is at least one of a containerboard, paperboard or corrugated material.

3. The blank of claim 2, wherein the corrugated material is at least one of a single wall, double wall or triple wall material.

20 4. The blank of claim 1, further comprising a lift cutout formed in said second side panel and said second divider panel.

5. The blank of claim 1, further comprising a divider cutout in said first divider panel.

25

6. A container, comprising:

- a pair of opposed first side panels;
- a pair of opposed second side panels, coupled with the first side panels;
- 30 a outer bottom panel connected with said first side panel;
- an inner bottom panel connected with said second side panel, said inner bottom panel being adjacent said outer bottom panel;
- a first divider panel; and,
- a second divider panel, said second divider panel being substantially perpendicular to said first divider panel;
- 35 wherein, said container is formed from a single piece of foldable material.

7. The container of claim 6, wherein the sheet of foldable material is at least one of a containerboard, paperboard or corrugated material.

8. The container of claim 7, wherein the corrugated material is at least one of a single wall, double wall or triple wall material.
- 5 9. The container of claim 4, further comprising a lift cutout formed in said second side panel and said second divider panel.
